Cynthia Trevino  
Principal

Dear Parents,

Southside High School is currently in Stage 3 of School Improvement for mathematics performance and graduation rate. Our campus did improve mathematics performance, but we must continue to improve in that area for another year in order to meet Adequate Yearly Progress (AYP). The Corrective Action Team, comprised of district administration, school administration, counselors, instructional facilitators, the technical assistance provider, and teachers, have created a Corrective Action Plan with four goals to address these areas:

1. Increase 10th grade TAKS mathematics passing rate to 67%.
2. Increase 10th grade Special Education students' TAKS mathematics passing rate to 67%.
3. Increase 10th grade ESL/LEP TAKS mathematics passing rate to 67%.
4. Increase Graduation Rate to 70%.

We are working diligently to ensure that every student at Southside High School graduates. If you need additional information or have any questions, please call me at 882-1606. Thank you.

Sincerely,

Ms. Cynthia Trevino  
Principal  
Southside High School
